## FULL STACK DEVELOPER

---

Possessing 3 years of experience in utilizing modern frameworks and libraries such as React.js, Next.js, Node.js, MongoDB, and Redux. Demonstrated proficiency in successfully delivering over 7 scalable projects, consistently ensuring alignment with user requirements and exceeding expectations.

## TECHNICAL SKILLS

---

Languages	: JavaScript, TypeScript, PHP, Java, Go, HTML, CSS
Frameworks	: React.js, Next.js, Node.js, Express, NestJS, React Native, TailwindCSS
Libraries	: Material, Redux Toolkit, React Router, React Query
Databases	: MongoDB, PostgreSQL, MySQL, DynamoDB
Devops/Tools	: AWS, Docker, Git, Jenkins, Vercel, Argo, Linux
Others	: Serverless Architecture, API Development, WebSockets, CI/CD

## EXPERIENCE

---

### Software Development Engineer 2

Acefone

August 2024 - Present

Gurugram

- Led migration to a **microservices architecture**, reducing system overhead by **85%**.
- Designed and deployed Kafka-based event system processing 500K+ daily events.
- Optimized APIs using Go and NestJS, improving response time by 40%.
- Managed AWS API Gateway for routing, authentication, and rate limiting.
- Refactored frontend with React.js and Next.js, reducing deployment time by 60%.
- Maintained Asterisk PBX, automating call flows for 100K+ daily calls.
- Built AI-powered post-call analysis system using LLMs and speech-to-text tools.
- Designed **Webhook pipelines** for asynchronous event processing.

### Software Development Engineer

Orufy Technologies

September 2022 - August 2024

Jaipur

- Monorepo setup with Turborepo and Nx for 4+ projects.
- A React Flow bot builder, speeding bot creation by 70%.
- Led a team of 5 developers .
- Streamlined email design with a drag-and-drop builder, reducing design time by 40%.
- Delivered 5+ scalable projects using **NestJS, Next.js, and Node.js**.
- Backend with server and Serverless Environments with AWS Lambdas.
- Developed 4+ plugins for Shopify and Wordpress applications.

### React.js Developer Intern

Fintricity

January 2022 - August 2022

Remote - London

- Created a Component Library with **Storybook** for 20+ reusable components.
- Migrated a 10,000+ line JavaScript codebase to TypeScript, reducing bugs by 50%.
- Implemented 10+ data visualizations using ReCharts for better analytics.
- Collaborated with a team of 7 developers to enhance project efficiency.
- Optimized application performance, increasing efficiency by 20%.

## EDUCATION

---

**Dr. APJ Abdul Kalam Technical University**  
Master of Computer Application

Meerut, U. P.  
August 2023 - July 2025

**Dev Bhoomi Uttarakhand Univeristy**  
Bachelor of Computer Application

Dehradun, Uttarakhand  
August 2020 - July 2023

**Vivekanand Intermediate College**  
Intermediate

Almora, Uttarakhand  
April 2019 - March 2020

## PROJECTS

---

### Zenodeck Connect

[Source Code](#)

- Real-time customer support chat app with multi-channel support using React.js, NestJS, and MongoDB.
- Developed an embeddable web chat widget for external websites
- Integrated WebSockets for bi-directional messaging and scalable communication.
- Used React.js for frontend and Nest.js/Node.js for backend
- Managed data with MongoDB for scalable and flexible storage

### Webtonative

- Transformed websites into mobile apps without coding.
- Integrated payment gateways; processed 5K+ monthly transactions.
- 50K+ active international clients.
- Tech stack: Next.js, TypeScript, Firebase, Node.js.

### E-Commerce Site

[Source Code](#)

- Responsive E Commerce website clone using **Next.js**, **TypeScript**, **Tailwind CSS** and **Redux Toolkit**.
- Implemented authentication using NextAuth.
- Added user delivery location feature using Geolocation-DB API.
- Created CI/CD pipeline with GitHub and Vercel for automation.

### Snappy - Chat App

[Source Code](#)

- Front-end using **React.js**, styled-components, **Typescript**.
- Backend with **Node.js**, **Express** and MongoDB.
- Real-time chat application with 99.9% uptime using **WebSockets** (Socket.io).

### GIF Maker

[Source Code](#)

- A gif maker web app using **React.js**.
- Backend with Node.js, Express and MongoDB.
- Used Web assembly and FFmpeg for video processing.
- Achieved 100% processing on the client-side.
