PROFESSIONAL SUMMARY

Backend Engineer specializing in distributed systems and real-time infrastructure. 3+ years of experience building high-throughput, low-latency systems using Kafka, Go, and AWS, powering high-scale systems handling 500K+ daily events and 100K+ voice interactions.

TECHNICAL SKILLS

Languages	Go, Java, TypeScript, JavaScript, PHP, SQL
Backend	Node.js, NestJS, Express, Spring Boot (familiar)
Frontend	React.js, Next.js, React Native, Redux Toolkit, TailwindCSS
Databases	PostgreSQL, MySQL, MongoDB, DynamoDB, Redis
Cloud & DevOps	AWS (Lambda, API Gateway, EC2, S3), Docker, Kubernetes, Jenkins, Argo CD, CI/CD Pipelines, Linux
Architecture	Microservices, Event-Driven Systems (Kafka), Serverless, RESTful APIs, WebSockets, System Design

PROFESSIONAL EXPERIENCE

Software Development Engineer 2 August 2024 – Present
Acefone Gurugram

- Architected and led migration from monolith to microservices architecture, reducing system overhead by **85%**.
- Designed and scaled Kafka-based event-driven system capable of processing **500K+ daily events**.
- Optimized critical API endpoints using Go and NestJS, improving average response time by **40%** under peak load.
- Engineered AWS API Gateway configurations for routing, authentication, and rate limiting across 15+ microservices.
- Refactored frontend architecture with React.js and Next.js, reducing deployment time by **60%**.
- Built and scaled a real-time Voice AI system integrating STT, TTS, and LLM orchestration using Pipecat and Livekit, enabling low-latency voice interactions over telephony infrastructure.
- Maintained and optimized Asterisk PBX, automating call routing flows for **100K+ daily calls** with 99.9% uptime.
- Developed asynchronous Webhook pipelines for reliable event processing with retry mechanisms and dead-letter queues.
- Owned end-to-end design and deployment of critical backend services, from architecture to production monitoring.

Software Development Engineer September 2022 – August 2024
Orufy Technologies Jaipur

- Architected monorepos using Turborepo and Nx, consolidating 4+ projects and reducing CI/CD build times by **35%**.
- Built a visual bot builder using React Flow, enabling non-technical teams to create chatbots **70% faster**.
- Designed a drag-and-drop email builder, reducing email design time by **40%** for the marketing team across 3 product lines.
- Led a team of 5 developers, delivering 5+ production-grade applications using NestJS, Next.js, and Node.js, serving 10K+ daily active users.
- Designed hybrid server/serverless architecture using AWS Lambda, reducing infrastructure costs by **30%**.
- Developed 4+ e-commerce plugins for Shopify and WordPress, extending platform capabilities for 200+ merchant clients.

React.js Developer Intern January 2022 – August 2022
Fintricity Remote – London, UK

- Created reusable 30+ UI components library with Storybook.
- Migrated large JavaScript codebase (10K+ LOC) to TypeScript, reducing bugs by 50%.
- Optimized application performance through code splitting, lazy loading, memoization, increasing page load speed by 20%.

EDUCATION

Master of Computer Application (MCA) August 2023 – July 2025
Dr. APJ Abdul Kalam Technical University Meerut, U.P.

Bachelor of Computer Application (BCA) August 2020 – July 2023
Dev Bhoomi Uttarakhand University Dehradun, Uttarakhand

PROJECTS

Webtonative — Website to Mobile App Platform [webtonative.com]

- Built a no-code platform that transforms websites into mobile apps, serving **50K+ active international clients**.
- Integrated multiple payment gateways processing 5K+ monthly transactions with PCI-compliant security measures.
- Tech: Next.js, TypeScript, Firebase, Node.js.
